

Step 9

Now connect the ends of the beams.
We use a rounded line to show wind.

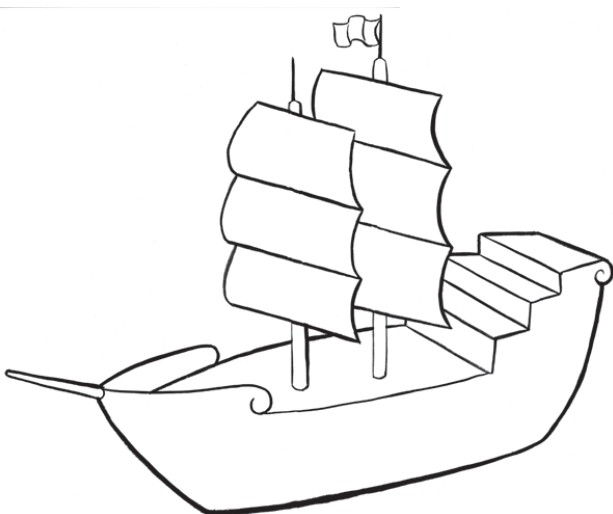

Step 10

Now extend line (j) upward a bit (m). From the top corner of (m), follow the arc of (a) and (b) to create the head rail. The bowsprit (n) is a long cylinder that plugs into the top of (m).

Step 11

Now erase any extra lines, and you're all set.
Add any details to your liking.

Final Step

Color your ship and background. Ahoy, Matey!
You've built a really cool Pirate Ship!
